

LG SMART THINQ™ SUPER-CAPACITY REFRIGERATOR

Our spacious Smart ThinQ™ Super-Capacity Refrigerator couldn't be a better match for a family. Its 31 cu. ft. capacity and the SpacePlus™ Ice System ensure that you have plenty of room for all the food your home needs.

The integrated 8" WiFi-enabled LCD screen makes managing your food and meals easier. You can see at a glance what food you have and what's expiring soon. Our innovative Smart ThinQ™ technology can suggest recipes based on the food you have available. And with the tap of a finger you can send a customized grocery list straight to your smartphone.

There are many other family-friendly features of the Smart ThinQ™ refrigerator:

- Smart Cooling Plus technology circulates cold, filtered air around your food at all times, keeping it fresher longer.
- Digital sensors monitor the interior temperature and humidity of the fridge and instantly adjust to keep food at its optimal conditions.
- The deep, 3-tier freezer means no more hunting around or digging to the bottom trying to find something.
- The door's roomy water and ice dispenser fits a 12" tall pitcher—perfect for things like making lemonade for the family to enjoy.
- Bright, efficient LED lighting lowers your energy costs.

The Smart ThinQ™ refrigerator—which won Electronic House's 2013 Product of the Year award—runs quietly and efficiently, saving you money. And because of its efficient design, LG's reliable linear compressor comes with a limited 10 year warranty, giving you peace of mind that your fridge is built to last.
